Investigate Internet Censorship

What is OONI Explorer?

OOONI Explorer is the world's largest open dataset on Internet censorship.

Since 2012, more than a billion network measurements from more than 241 countries and territories have been published on OONI Explorer.

Scan to learn more:

Search tool

Use OONI Explorer to find data on:

- **Blocking of websites**
- **Blocking of instant messaging apps** (e.g. WhatsApp)
- **Testing of circumvention tools** (e.g. Psiphon VPN)

...and more!

Measurement Aggregation Toolkit (MAT)

Track Internet censorship worldwide and create charts based on real-time OONI data collected from around the world.
